Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 6-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Majid et al. (U.S. Patent # 5,852,550).

Majid et al. disclose the claimed invention a power supply (figure 1- 4), including a first operation mode, a second operation mode, a burst (column 1, line 1-5, a first control circuit, a second control circuit (Abstract, line 1-7), a switching controller (figure 2) enabling and disabling first and second controller (column 3, line 1-65).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2838

4. Claims 14-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hong et al. (U.S. Patent # 6,646,894) in combination with Shutts (U.S. Patent # 5,959,851).

Hong et al. disclose the claimed invention a power supply (figure 1-3), including a operation mode controller (figure 1, item 400), a main circuit, a voltage control oscillator, a driver, a standby circuit, a burst mode operation (Abstract, line 1-23, column 7, line 1-20 and line 45-65). Hong et al. does not disclose utilization of the technique for pulse width modulator to operate main circuit. Shutts teaches the utilization of the similar technique for pulse width modulator to operate main circuit (column 3, line 60-67+). It would have been obvious one having an ordinary skill in the art at the time the invention was made to modify Hong et al. power supply by technique taught by Shutts for the purpose of increasing efficiency of the power supply.

Allowable Subject Matter

5. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ranking B. Patel whose telephone number is 571-272-2082. The examiner can normally be reached on 6.30-5.00; m-f.
